

The essential nature of iron usage and regulation

Jerry Kaplan* and Diane M. Ward*

(Current Biology 23, R642–R646; August 5, 2013)

As a result of a journal oversight in the originally published version of this Primer, the heme molecule in Figure 1B included an H₂C group at the upper left that should have been an H₃C group. This error has now been corrected in the article online. The journal apologizes for the error and any confusion that may have resulted.
